

# Could you improve your trading?

## You can with NinjaTrader™.

It is a proven fact that as emotions and stress increase your ability to think with precision diminishes. As a trader, you need to find a way to overcome these limitations to gain your competitive advantage in the market.

FREE trial available at  
[www.ninjatrader.com](http://www.ninjatrader.com)

What if your trading application provided you a way to...

- Focus on trade management and not order supervision
- Automatically place your stop loss and profit target orders
- Intelligently trail stop your profits
- Manage relationships between all orders protecting a position

*When it comes to executing your trades, NinjaTrader thinks like you only faster! Through a highly intuitive user interface it increases your ability to execute efficiently and accurately at times where precision thinking is critical. NinjaTrader was designed from the ground up to improve your trading.*

**NINJA**  **TRADER**  
[www.ninjatrader.com](http://www.ninjatrader.com)

Order creation and management can be a time consuming and erroneous process especially when trading fast markets, with NinjaTrader™, the order execution process is efficient and accurate providing you the edge you need to succeed.

**Advanced Order Management**

- Single click order submission, modification & cancellation
- Easy to understand visual order representations
- Automatic submission of stop loss and profit target orders
- OCA capability
- Advanced simulated stop loss

**Advanced Position Management**

- User defined position strategies
- Multiple profit targets
- Automatic updating of stop loss and profit target orders when scaling in or out of a position

- Auto-trail, auto-breakeven and auto-chase
- Add/remove targets

In today's fast moving markets, a profitable position can turn into a loser in seconds! When you have to act fast, NinjaTrader will give you the edge to implement trading decisions with lightning fast speed and accuracy.

**Multi Broker /Account Support**

- Connect to multiple brokers simultaneously
- Distribute orders across multiple accounts
- Patsystems based brokers, MB Trading & InteractiveBrokers are currently supported

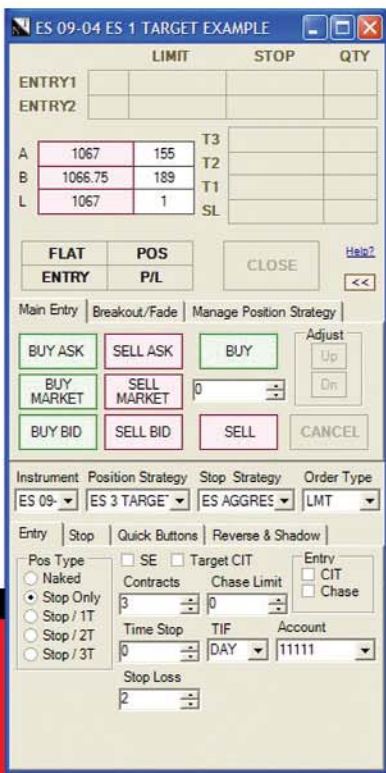

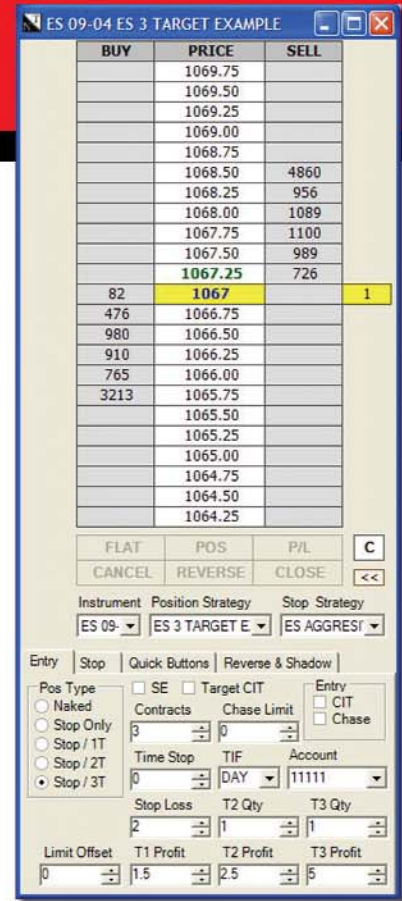

**Trade Automation**

- Universal text file interface
- Support for most charting applications
- Test your systems in real-time simulation

Let NinjaTrader be your gateway between your charting application and your broker. Automating your trading systems order execution has never been easier.

**Simulation**

- Full order and account simulation
- Traded in live mix/simulated environment
- Trade live while running an alternate strategy in simulation
- FREE fully functional simulation platform

NinjaTrader's state of the art simulation engine factors in bid/ask size, last trade, time and order delay to determine fill probability. Use the simulator to forward test strategies or to simply improve your trading skills.

**Performance Reporting**

- Multiple filtering criteria
- Multiple report options including comparison reports
- Record notes on each trade
- Wide array of statistics
