DecisionBar Trading Software now Available on NinjaTrader™ Platform

FORT LAUDERDALE, FL, July 2, 2007 -- DecisionBar Trading Software in conjunction with NinjaTrader, LLC announced today the immediate availability of DecisionBar technical indicators for the industry leading NinjaTrader trading platform.

Whether one is trading the eMini, FOREX, Commodities, Futures, Stocks, Bonds, or virtually anything liquid, DecisionBar's revolutionary new indicator will predict market movement and issues buy and sell signals with amazing accuracy. Decision Bar is a perfect fit with NinjaTrader since NinjaTrader is a true multi-asset trading platform and can also be used for free with many popular data and brokerage feeds.

"Our DecisionBar Trading indicators leave nothing to chance since the strategy indicator points out in real time the optimal points to enter a trade, and the direction of the trade," said Les Schwartz, president of DecisionBar Trading Software. "It is very exciting to add this capability to the popular NinjaTrader application which will allow traders to place orders right from the NinjaTrader charts using trading signals generated by DecisionBar's proven algorithms.

A DecisionBar is a specific bar on a bar chart, or a specific candlestick on a candlestick chart that render natural trading opportunities that are in sync with the rhythm of the market. As such, the timing and direction of the potential trade are pre-determined. All that is left for you to do is to evaluate risk and determine if you wish to take the trade. Once a potential trade is identified, our proprietary DecisionBar Risk Oscillators helps you define risk and decide whether or not to take the trade and we have three different Risk Oscillators; one for Stocks, one for Futures and one for Forex."

About NinjaTrader, LLC

Founded in 2003, NinjaTrader, LLC (www.ninjatrader.com) has quickly emerged as a leading developer of high-performance trading software. The company's flagship trading platform, NinjaTrader, is a FREE application for advanced charting, market analytics, system development and trade simulation.
