Welcome Place joins NinjaTrader's 3rd Party Partner Program

Denver, CO, February 5, 2010 – NinjaTrader, LLC is pleased to announce the addition of Welcome Place to their 3rd Party Partner Program. Welcome Place members can execute trades in Futures, Forex and Equities through NinjaTrader, an industry leading end-to-end trading platform that is supported by all leading market data vendors and a vast world-wide network of supporting brokerages.

Welcome Place Inc provides an in-depth education Trading Center specializing in day trading the highly volatile forex and futures markets. Launched in 2004, the mission of Welcome Place is to deliver the tools and resources to help members become successful day traders and active investors. Their unique educational program offers instruction on how to identify market direction, support and resistance, proper risk management and how to protect their position using stops and targets.

NinjaTrader's user-friendly charts, Chart Trader and Advanced Trade Management (ATM) technology are critical tools to the success of Welcome Place students. Students use the proprietary Welcome Place indicators to plot support and resistance areas on their NinjaTrader charts to identify market opportunities. Students then capitalize on these market opportunities using NinjaTrader's Chart Trader and ATM technology to submit, modify and cancel orders directly off the same chart.

"NinjaTrader's ATM execution technology helps us teach trader discipline to our less experienced traders and allows our more experienced traders to capture more trades" says Maximus Troy of Welcome Place. "NinjaTrader's customer service and free daily training sessions make it easy for our students to quickly and easily learn the platform. We are very excited to be partnered with an industry leader and look forward to furthering developing this strategic partnership."

About NinjaTrader, LLC

Founded in 2003, NinjaTrader, LLC (www.ninjatrader.com) has quickly emerged as a leading developer of high-performance trading software.
